

# We are more than healthcare

At The Floating Hospital, we do whatever it takes to bring healthcare, relief and comfort to children and families in New York City living with homelessness.

We start by safely transporting families from homeless shelters and domestic violence safe houses throughout New York City to and from our healthcare center. Families are welcomed to our fully integrated primary medical, dental and behavioral healthcare facility. Our holistic approach includes health education, case management, and distribution of necessities, including healthy foods, seasonal clothing, baby care and personal hygiene products, school supplies, children's books and toys, and much more.

## Here's how you can make a positive and lasting impact:
