

THE FLOATING HOSPITAL

Attention Case Managers

How to ensure your residents get full service care at The Floating Hospital

All shelter residents are required to enroll in a Medicaid Managed Care Plan and must choose a Primary Care Provider (PCP).

1. The Floating Hospital accepts all Medicaid Managed Care Plans.
2. Families must switch their Primary Care Physician (PCP) to The Floating Hospital in order to receive the full array of services we offer, such as medication, vaccines, asthma plan treatments, school forms and further referrals. The Floating Hospital staff will assist patient(s) in switching on the day of their first appointment with us.
3. As a PCP, The Floating Hospital will serve as your residents' family doctor and support you in providing continuity of care.

We look forward to serving your residents during this transition.
